Vertebrate Zoology By Kotpal is a book written by M.S. Padhani, I.D. Mughesh in 1998.The invention relates to a process for the reactive bonding of parts made from plastics material to parts made from metal by means of a brazing agent which contains at least one brazing alloy which comprises, by weight with respect to the total weight of the brazing alloy, (1) one or more components of the group consisting of Pb, Zn, Ag and Bi, and (2) one or more components of the group consisting of Cu, Ni and Sn, wherein the brazing agent is applied to at least one of the parts to be bonded, and wherein, after drying the parts to be bonded and the brazing agent, the parts are heated to a temperature of 200.degree. C. to 350.degree. C. for a time period of 10 to 240 minutes, whereupon bonding is effected between the metal parts by diffusion of the brazing
