cryptocurrency exchange Gemini has launched its own bitcoin cash (BCH) trading pair, trading against the US dollar-
pegged stablecoin tether (USDT). Gemini exchange – a venture of the Winklevoss brothers – was launched in 2014 by the
Gemini Trust Co. and debuted for trading via a partnership with the San Francisco-based Circle exchange. Continue
Reading on CoinDesk Like this: Like Loading...It is known to form glass sheets by a float process. In a float process,
molten glass is introduced into a forming chamber where it is coated on the inside of the forming chamber with a forming
composition. The forming composition can include chemicals known to improve the physical properties of glass. A float
glass process is shown, for example, in U.S. Pat. Nos. 2,860,964; 2,877,149; 3,379,522; 3,404,166; 3,492,357; 3,676,387;
4,459,252; 4,492,595; and 4,701,847. Forming compositions have been used to coat glass sheets to provide chemical
strengthening of the glass. Such chemical strengthening can be achieved by forming a porous surface layer of the glass by
contacting the surface of the glass sheet with a slip and applying heat to the slip in the presence of an atmosphere
containing a chemical such as fluorosilicate. The chemical in d4474df7b8
