Transmission Shift modes - Audi A6 C6 - Avant in 4.As you read this article, hundreds of tweets, Facebook and other social media messages will be flying between you and your friends and family. Some might include detailed revelations of secret affairs, private affairs, relationships, violence and other personal details, and some might just be about the last time you saw a pair of shoes. The good news is that social media messages are supposed to be private and for a lot of people, that's true. But while the information we put online might be private, it's still readily available to anyone with an Internet connection. And anyone who has access to your accounts, either on your computer or via social media itself, can access your private information. For some, this can be problematic. The good news is that there are plenty of ways to protect your personal information. Before you click that tweet button to send someone a message that includes pictures of your boss' mistress, you might consider taking a few extra steps to protect yourself. Use strong passwords If you have a mobile device, make sure it's password-protected. And don't use the same password for your social media account that you use for your banking account
