With the advent of cellular telephone technology, user's need for mobility is greatly improved. As technology progresses, cellular and mobile telephone communication systems are increasing in capabilities, allowing for the use of higher frequency signals to convey voice and data to facilitate the location of a mobile telephone within a cellular or mobile communication system. In typical mobile telephone communication systems, a mobile telephone communicates over a wireless air interface with one or more Base Stations (BS). A typical wireless mobile communication system (also known as a cellular communication system) is comprised of multiple cells. Each cell is serviced by a
