
Mcafee Download Using Grant Number

After activating the product in the McAfee Management Console, the grant number is still required. Download Links with Grant Numbers are Valid, but Cannot be Used to Install AntiVirus (McAfee) Grant numbers are required to perform a product download. Authentication for Product Downloads requires a Grant Number. To download McAfee products, you must be a McAfee customer with a grant number. You cannot use a grant number that you have not saved. To download products using a grant number, login to the McAfee Service Portal and then enter your grant number and email address to perform the download. login failed using McAfee Management Console with different grant number you can't login with your valid grant number to the McAfee Management Console. you can't login to the McAfee Management Console using your valid grant number. If you use your original grant number to register with the McAfee Service Portal, your login information will become invalid and you will not be able to log in. McAfee ePO™ Software for Mac

User Guide - Support - View technical content, FAQs, and technical support information As of May 23, 2015, the ePO License Manager client has not been updated. There are no version numbers available for any McAfee product. Version history for the ePO License Manager client. ePO License Manager client development version. McAfee Cloud Service (MCS) The McAfee Cloud Service (MCS) is a network-based file-sharing service that allows organizations and individuals to transfer files of any type and size over the Internet. The McAfee Cloud Service enables McAfee customers to quickly share data across geographically disparate sites or with McAfee resellers and partners. McAfee Cloud Service includes encryption and authentication capabilities and is available as a public, private or hybrid service. The McAfee Cloud Service Client that is installed on a device is used to log in and check for updates. The McAfee Cloud Service Server is used to store the data. McAfee Cloud Service Security Features Files are encrypted before being transmitted and

then decrypted when received by the device. Data is transmitted only to the McAfee Cloud Service Server, which is physically located in a different location than the device. McAfee Cloud Service is PCI DSS 3.1 compliant. McAfee Cloud Service Server Requirements and Guidelines The McAfee Cloud Service Server should be located on a secure network infrastructure,
