the Let :Q الافلام والاذاني والاصوات من الفيديو هنا:  
user set an Ip address manually in a webform  
I'm using Drupal 8.6.7. I have a webform with  
a field called 'form\_build\_id', in which I set  
the value as: array ( '#weight' => -20, '#title'  
=> t('Type of connection'), '#type' =>  
'list\_text', '#options' => array ( 'air' => t('Air'),  
'cable' => t('Cable'), 'dialup' => t('Dialup'), ),  
'#default\_value' => array ( 'form\_build\_id' =>  
'user\_settings\_form', ), ); I want the user to be  
able to set an ip address, but I don't want to  
make an Ip module. The address field in this  
form is restricted to lower case, and the user  
should not be able to add numbers. Is there a  
way to do this? A: You can use the
