If you are installing the online version of AutoCAD, you need to use a "Storage-based" connection. If you need to use a "Net-based" connection, it means you are installing the offline version of AutoCAD. A Storage-based connection is required for storage of drawings, grids, templates, etc.

The resolution was moved by the Dushyant Chautala, the rebel Congress MLA who has been at the forefront of protests demanding its repeal. Chautala had threatened on Monday to move the Supreme Court to seek its intervention in the issue, saying the Haryana government was “overstepping” its powers and had no right to regulate morality. “We want the Supreme Court to seek an explanation from the government,” he told reporters after the resolution was passed in the House. He added that the Bill is “anti-constitutional and unconstitutional and should be immediately repealed”. Both parties involved in the controversy over the Ordinance — the Congress and the Haryana Janhit Congress (BL) — supported the resolution moved by the BJP. The ruling BJP’s support came as a surprise as the ordinance was passed by the previous Congress-led government in August. The bill comes at a time when the party has come under fire for not being forceful enough on the issue. On Monday, a day after a senior cabinet minister from the state assured the Haryana Assembly that the ordinance would be repealed, the BJP legislators appeared to backtrack on their earlier stance. On Friday, a delegation of the BJP’s ally, Haryana Janhit Congress (BL), a1d647c40b
