Jobee Crack+ [Mac/Win] (Latest)

Jobee is an intuitive application that you can use to listen to radio stations from all over the world. It targets all types of users, whether they are beginners or advanced. The interface of the program is made from a standard window with a well-defined layout, where you can select channels according to their genre. The channels list also shows the language and country of origin for each item. It is possible to use a search function when dealing with a long list of stations, as well as add a new channel to the list by pointing out the station name, stream URL, language, country, category, home page, logo URL, additional stream URLs and description. Furthermore, you can play a random station, edit a radio station, create a favorites list, as well as access RSS feeds, online TV stations, the media library, books and the weather report. Plenty of configuration settings are available for Jobee. For example, you can establish the RSS channels refresh time, customize the font, choose another UI language, as well as modify the default cache folder and directory for storing media content. Jobee requires a moderate amount of CPU and system memory, has a good response time and works well, without making Windows hang, crash or pop up error dialogs. We have not encountered any issues during our testing. Thanks to its intuitive interface, Jobee can be easily figured out, even by first-time users.
