Viking Crack+ Free Download

Viking is a great GPS utility that provides you with easy access to all of your GPS data in a simple to use manner. It is built with a clean and simple interface, and comes complete with a web browser for viewing and downloading different types of GPS maps. Viking is simple, easy to use and totally free, so it is the perfect piece of software for most people. STViking is a full-featured tool for viewing GPS, GIS and GISM data. Designed for the IT professional and for geospatial professionals in the field, STViking includes the capability to import and export STM, KML and GPS waypoints. Your PC can always be connected to the Internet by using an IP connection. Downloads Forum Help and user guides Viking Driver Download Viking Software Download New to GPS Online? GPS Online - Get and use GPS data GPS Online is an open GPS data service. You do not need any software to use the service, as all data is available via the web. Most free GPS data sets are limited in the number of waypoints they can have, their accuracy, their resolution and the number of seconds a waypoint can have a position. We offer a complete GPS data set that is free of charge. We do not limit you to a certain number of points or impose a resolution on your GPS receiver, making it the most complete free GPS data set on the Internet. The service is completely free and open to all, which makes it one of the most relevant and easy to use GPS data sets in the world. Why use GPS Online? To browse and download GPS data, check the file type and dimensions of your GPS receiver Compare data sets and determine which one is best for your project and receiver GPS Online currently provides the most complete free GPS data set on the Internet. You can compare it to the other GPS data sets that you find on this website, and find out which one is best for you. GPS data sets online are not only useful for researching a project, but for the everyday use as well. Many users of GPS data sets online do not have a receiver to collect their own data, but use data sets like ours to find new routes and explore the world. You can also check all the data that you have previously collected, or compare your own data with that of others

Viking

-- DAWSONE -- Dawson, which is developed by the Commercial Software Association (CSA), is a sound recorder software which can be used for practically anything. It is also a great solution for creating soundtracks in videos, taking notes, recording telephone conversations and even organizing them in a custom sequence. -- DAEMON Tools -- Daemon Tools is a powerful, all-in-one disk partition manager which enables you to resize, split, copy, move, check and manage drives, folders and partitions. -- DreamWeaver -- DreamWeaver is a web-based application which comes with a WYSIWYG editor and a bunch of other features such as a file manager and image editing capabilities. DreamWeaver has an open architecture and has many extensions available. -- Everest -- Everest is a full-featured PDF creator and manager for Windows. It allows you to create PDFs from almost any document (Word, Excel, PowerPoint, PDF, HTML, Web pages and more), and you can either create a PDF file or save it to a variety of locations. -- Extremely Big File Manager -- Extremely Big File Manager is an all-in-one file manager which provides users with many useful functions and enhancements. The software is a pretty good solution to address large files, zip archives and folders, and you can also carry out a number of useful operations with them such as changing the file or folder permissions, modifying the properties, sorting and searching the contents, as well as view the contents. -- File Manager Lite -- File Manager Lite is a user-friendly file manager for Windows which supports different file types and properties, and it can be used in both stand-alone and Internet Explorer. -- FileStealer -- FileStealer is a powerful file sharing software, which enables you to create a secure, fast and convenient file sharing environment for large groups of people. -- FTP Manager -- FTP Manager is a free FTP client application for Windows which is part of the Open Source Geospatial Foundation (OSGeo) community. This program allows you to browse files, upload them, share them, or create a folder with FTP. -- Garden Plotter -- Garden Plotter is a software program which can be used to draw your garden, track your plants and plan your garden. It is compatible with Windows 2000/XP/2003/7. -- IMagic32 -- IMagic32 is a digital photo 1d6a3396d6

Viking

Viking is an application for GPS data visualization and management. It's free for non-commercial use. Viking consists of two parts: map viewer and geocoding. Map viewer is used for browsing folders, upload files and download files from the map database. Geocoding is used for geocoding, analyzing, managing and visualizing your files with one click. Viking supports popular map formats (Google Earth, GPX, KML), many files formats (GPS track files, .jpg, .bmp, .tif, .png, .wav, .wma, .mid, .midi), as well as many GPS devices (Garmin, Magellan, Apple, Rino). Key features:

- Geocoding
- Large map database
- Upload files and download files
- Map viewer
- Unique database of files
- Waypoints and tracks management
- Layer support (GPS track files, .jpg, .bmp, .tif, .png, .wav, .wma, .mid, .midi, .kmz, .kml)
- Directory browsing
- Coordinates and waypoints creation
- Bounding box selection
- Routing
- Coordinates transformation
- Erect a map with optional control buttons
- Display current and future positions of a track
- Different map projections
- Create a point, polygon, line or track
- Save a track to the track file (cannot open with GPS devices)
- Geocode files to various addresses, POI and coordinates
- Attach map to a coordinate (maps, photos, notes)
- Visualize, edit and/or print a coordinate
- Single and multiple points (scale, size)
- Customize map and layer display
- Full screen
- OpenStreetMap is supported
- Geocoding in popular languages
- Navigation by latitude and longitude
- Forward and backward search
- Distance to a waypoint
- Routing to the nearest or desired waypoint
- Distance to the route
- Visualize track on the map (small circles)
- Map centering
- Mouse scrolling
- Reverse display of tracks and waypoints
- Routes and tracks management
- Zooming and panning
- Tracking
- Printing of maps and tracks
- Inverse point
- Save maps in the default format
- Duplicate a map
- Add pictures
- Live map
- Statistical charts

What's New In Viking?

View and edit GPS data with ease of use and powerful options. Download now for free. View and edit GPS data with ease of use and powerful options. Viking is a software application that provides users with a simple means of viewing and managing GPS data, as well as add multiple types of layers. Easy-to-use environment The installation process does not last very long and does not offer to download any kind of third-party products. The interface encompasses a pretty minimal design, as it only includes a menu bar, several buttons and two panes in which to view a folder structure and the actual uploaded map. Aside from that, extensive and pretty well-organized Help contents are included, which ensure that both power and novice users can easily learn how to handle it. Files types you can use This utility enables you to upload maps from Google Earth, GPX and Viking, while it is also possible to export them in a GPX or KML format. You can append files with just a click of the button, as well as acquire maps and information from a custom URL, Wikipedia waypoints, OpenStreetMap Notes, geotagged JPG images and various types of GPS maps. Generate pictures and create waypoints Properties can be brought up with ease, while you can also generate a PNG or JPG image of custom width, height and zoom. It is possible to go to a specific location, latitude and longitude, or UTM, while you can also add new aggregate, map, DEM, GPS, coordinate or track waypoint layers. Last but not least, you can pan and zoom, select a specific area, show a ruler, create waypoints, tracks and routes, how pictures and find a particular route. Conclusion and performance To wrap it up, Viking is a pretty useful piece of software which enables you to manage GPS data in an efficient manner. The computer's performance is not going to be burdened at all, the response time is good and the interface is simple and intuitive. We did not detect any kind of errors or crashes in our tests, and there are plenty of options to keep you glued to the PC for a while. Downloads: 582 Impose makes tracking a person's location available to others. Impose uses your mobile phone's GPS (if available) to track your location.

- Set an expiry date for your location details
- Add a location to your contact list
- Share your location with your contacts
