A bit of writing about Netseeker, one of the useful search engines that helps you in tracking down torrents and YouTube video downloads. The basic functions of Netseeker are: Torrent File Downloader One of the most useful functions of Netseeker is that it is able to extract all torrent file information with a single mouse click. This is mainly because of the search function available in the application. All you have to do is to enter the file and the tracker URL, click and Netseeker will locate the torrent file and shows you all the download links with the torrent file information. For example, if you want to download a torrent file with the name("Final Fantasy 3 Hack"), the URL(" and the host name("ftp.fei.ttu.edu.tw"), you need to enter only the host name in the search box and click Search. Result Images Netseeker has an amazing image result. The result looks like the images loaded from the website itself. Be it a website, a magazine, a document, an image, or anything else, you can have a whole row of full-size image results. Netseeker may have a fairly decent speed when it comes to searching.
