What's New in the AutoCAD?

Simplify mouse operations with the updated mouse system. A single click of the mouse now selects the whole drawing. Control with keyboard, using the up and down arrow keys. New icons in the Panels menu offer simpler access to common commands. Windows versions of AutoCAD include the option to disable menu tooltips for legibility. In the command line, “>>” is the new symbol for assigning a prompt, and “>” is the symbol to indicate the end of a prompt. A new command for exporting drawings to HTML is available. As in previous releases, the Python language is used as the core scripting language for AutoCAD. New to AutoCAD 2023, the Python debugger, py.exe, is available for Windows users. Linework and multi-segment commands are the core components of AutoCAD's linework system. Linework and multi-segment commands are new additions to the Linework system. These new commands allow you to dynamically change the shape of linework, and automatically recalculate their dimensions. You can combine this functionality with AutoLISP and work in conjunction with Z-TOL. Lines can now be defined as parallel or perpendicular to a specified plane or two-dimensional axis. You can now set the bounds of linework, using the SetBounds command. New arc type commands available in the Arc command. They are: Ellipse: Arc shape of an ellipse. Isosceles: Arc shape with 2 straight ends, like a scissor. Pentagon: Arc shape of a pentagon. Pentagram: Arc shape of a pentagram. Pentuplet: Arc shape of a pentuplet. Start/Endpoints: Arc shape made by connecting 2 points on the straight sides of a rectangle. Triangle: Arc shape of a triangle. (video: 1:27 min.) Spatial: Now, the Spatial command is automatically invoked when a linear object, such as a line, arc, or text, is drawn. ArcType: You can choose from 4 arc type commands: Ellipse: Create a set of arcs to form an ellipse. Isosceles: Form an arc of two straight segments. Pentagon
