Cervical dystonia is a complex movement disorder characterised by sustained muscle contractions affecting the neck which are often accompanied by sensory disturbances. It is one of the few movement disorders that can occur in isolation or as part of a more complex movement disorder. The diagnosis of dystonia remains clinical and is based upon careful history taking followed by detailed clinical examination. This article reviews current ideas on the pathogenesis of the various subtypes of cervical dystonia and current theories regarding the role of brainstem dysfunction and abnormalities in the neural structures involved in the generation of movement and posture.Q: Trouble with Query C# I'm getting and error: Syntax error I'm not sure what I'm doing wrong. // Submit form to update the user record SqlConnection cn = new SqlConnection(@"Data Source=.\SQLEXPRESS;AttachDbFilename=C:\Users\dddd\Desktop\Modules\MyDB\Products.mdf;Integrated Security=True;User Instance=True"); string cmdText = "SELECT * FROM Product WHERE user_id = @user_
