Despite scientific advances, there is still little progress in understanding fitness concepts in general and the different dimensions and influences on fitness in particular. The present paper develops a comprehensive definition of fitness based on three main assumptions: (1) fitness is defined as a kind of size, (2) fitness is a static attribute of organisms, and (3) fitness is a property of the environment. The way in which the environment interacts with organisms shapes the dimensions of fitness, and fitness is influenced by selection, development, and adaptation, which are all components of the environment. Based on these three assumptions, a proposed comprehensive definition of fitness is discussed and illustrated with examples. For each dimension of fitness, scientific advances and their implications on fitness as a whole are presented, and the need for a general definition of fitness is highlighted. Finally, the adaptive landscape theory is applied to demonstrate the importance of understanding these three aspects of fitness and their interrelationships in making progress in the understanding of evolution.I've got a lot to say and I'm only getting started. First off, I've been getting some messages on Twitter and on facebook people have been asking me about the Stitch Fix box we got and the contents we received. I understand the frustration of receiving an unpersonalized box and having to chose what you like and what you want to keep. I thought I would sum up my feelings on the experience because what you see in the photos is only the tip of the iceberg. I can't speak for everyone else, but I've been fortunate enough to not receive a box for a long time now. The last time I received a box in the mail was in 2011 and in 2012. I ended up getting 3 Fixes because I wanted to get a different look for every season. This year however was pretty different. What I received didn't look like anything I'd seen from Stitch Fix before. Even though there was a floral in the back, the front was completely different. It wasn't floral and it wasn't black and white. It was the beginnings of a stitched up look that was starting to evolve. It reminded me of the early-2000's when men's
