If I run it from the command line, all I see are the failed log attempts. If I run it from the server, it works fine -- log message shows in the error log on the server. Things that don't work: Exception shows up in the log, but the exception message is empty. Log messages don't show up. I don't get anything in the server log file. I've tried outputting the strval into stderr -- it comes out right. I've tried redirecting stderr to stdout -- no change. Any ideas? import sys import os import config config.path = os.path.realpath(os.path.join(os.path.abspath(os.path.join(os.path.dirname(os.path.realpath(__file__)), 'config')))) #
